Charles H. Wright Museum of African American History

The Charles H. Wright Museum of African American History is in the process of installing a new S.T.E.M. based unit in our Inspiring Minds: African Americans in Science & Technology exhibition. The museum is in search of audio snippets of Black Africans speaking non-colonial languages. The museum has elected the countries of South Africa, Mali, Libya, and the Democratic Republic of the Congo, looking for four different geographical areas- and may select different countries, based on the availability of speakers or audio you may already possess. The audio can be a conversation followed by a translation, or instructional with a few words being said.
